

Inventory Replenishment and Approval Procedure

doc_aur_inventory_replenishment_sop | Synthetic operating document

1.0 Stockout Review

Logistics reviews available stock, recent demand, delayed inbound quantity, reorder points, and safety stock before proposing replenishment.

2.0 Draft Purchase Order

The agent may draft a schema-valid purchase order, but it cannot submit the order without the required human approval.

3.0 Approval Threshold

External purchase order po_aur_approval_00001 for USD 3,536.00 requires Founder or CFO approval before submission.

4.0 Audit Trail

The approval decision, actor role, timestamp, draft payload, and final status must be retained for crash-safe resumption.
